

Hobart Market Update 2nd Half 2024

OVERVIEW

In Q2 2024, Hobart* recorded a median house price of \$833,000, and a median unit price of \$650,000. This represents annual (Q2 2023 – Q2 2024) median price softening of -7.2% for houses and -4.4% for units. Comparing Q2 2023 vs Q2 2024 house sales increased by 10.8% (to 133 sales in Q2 2024), whilst unit sales decreased by -25.8% (to 66 sales in Q2 2024). Higher interest rates and lower consumer confidence has translated into the market, as median prices softened regardless of the number of sales. This creates a more affordable market for first home buyers, and thus an opportune time to enter the market and transact.

FUTURE DEVELOPMENTS

Hobart is set to see approximately **\$1.1B of new projects commencing construction in the 2nd half of 2024.**

These projects will stimulate economic growth and create job opportunities in Hobart. This will have a spill-over impact on the real estate market, in the form of higher demand for housing.

The UTAS Southern Campus Transformation (\$600.0M) is the largest commercial project due to commence construction in the 2nd half of 2024. This will merge the two Hobart university campuses, which will allow for more opportunities

There are a few residential projects planned, adding much needed stock to the Hobart market. They include:

- 47 Maning Avenue Apartments (11 Units/Apartments)
- 85 Athleen Avenue Units (10 Units/Apartments)
- 14 Kooyong Glen Units (11 Units/Apartments)
- 19 Yardley Street (4 townhouses)

AVERAGE VENDOR DISCOUNT*

Average vendor discount reflects the average percentage difference between the first list price and final sold price. A lower percentage difference (closer to 0.0%) suggests that buyers are willing to purchase close to the first asking price of a property.

Average vendor discounts between Q2 2023 and Q2 2024 have tightened, to a smaller discount of -1.3% for houses. Similarly, average unit vendor discount have tightened, to a lesser discount of -0.5% in Q2 2024. The property market in Hobart still favour buyers, as the final sale price is below the first list price. That said, the market is shifting towards sellers, with lesser discounts for both property types. Thus, buyers should act quickly to benefit from a discount.

The suburb of Sandy Bay has historically outperformed the wider Hobart Local Government Area (LGA) in both house and unit median prices. House prices in Sandy Bay has softened throughout 2023 and remained stable in 2024, which brought it back on par Hobart LGA. Now is an ideal time for buyers to capitalise on this opportunity.

The dominant proportion of homes sold in Hobart* across 2024# were in the premium price of \$1,000,000 and above (42.9%). In contrast, 42.1% of units sold were in the most affordable price point of less than \$599,999. That said, the unit premium market is strong, with 37.6% of sales. This suggests there is a home for every budget in Hobart.

MARKET COMPARISON

The market comparison graph provides a comparative trend for the median price of houses and unit over the past 5 years. The suburb chosen was based on their proximity to the main LGA analysed, which is Sandy Bay*.

RENTAL GROWTH 2024€

House rental yields in Hobart* was 2.9% in June 2024, lower than Hobart Metro (3.5%). That said median house rental price remained stable in the past 12 months to Q2 2024, at \$590 per week, whilst the number of houses rented fell to 283 (in Q2 2024). Median unit rental price increased by 2.2%, to \$470 per week in Q2 2024, with the number of units rented also increasing, by 0.4% to sit at 272. Overall, there is a highly demand rental market in Hobart*

2-bedroom houses have provided investors with +1.0% rental growth annually, achieving a median rent of \$520 per week.

Hobart* recorded a vacancy rate of 2.7% in June 2024, which is above Hobart Metro's 1.5% average. Vacancy rates in Hobart* have fluctuated, due to investors entering/exiting the market alongside cash rate hikes. However, it has dipped slightly over the past 12 months, indicating tighter rental demand. With this dip, the vacancy rate has now lowered to sit below the Real Estate Institute of Australia's 'Healthy' Benchmark of 3.0%, indicating quicker occupancy of rental properties. This confirms a conducive environment for investors.
